1980 article index

January

George E. Seeley and Paul V. Crooks: two outstanding wire men retire— *Ruth W. Rose* 50
High performance copper rod breakdown machinery and nonferrous spoolless cores handling equipment— *Guido J. Peene and Noel E. Kemel* 56
The ABC's of glass fiber strength— *Frederic J-Y. Quan and Suresh T. Gulati* 62
Copper wire rod—the changing industry environment— *Louis M. Perlman* 66
Recent developments in DC dancer arm wiredrawing machines— *Guido Bizzi and Peter Gill* 72
New technologies in die making— *John M. Giraud and George M. Joakim* 78
Finishing carbide and steel dies— *Art Leaver* 80
A die maker's look at the economy— *Jerry Richards* 82
Dies & equipment—a mini-directory of dies, compounds and equipment 88
1979 Article index 97
Delegates from 30 countries attend IWCS 98

February

Laser technology enlightens wiremaking process— *George B. Foster* ..48
Measuring, testing and inspecting equipment 53
Factors affecting the annealing behavior of aluminum wire— *Horace Pops* 72
A contribution toward solving the problems of high-speed drawing— *Ladislav Liska* 80
Cabling of optical fibers— *Mir Mujibar Rahman* 88

March

7th International Wire Exhibition, Basel, Switzerland—a preview of exhibitors 54
A die maker looks at a quarter century of change and offers a few predictions— *Leonard A. Zucker* 78
Product liability insurance: is there hope for the eighties?— *Ruth W. Rose* 84
The influence of segregation on the drawability of high-carbon steel rod— *Andrew G. Stacey* 92
Upward continuous casting technique in the production of nonferrous wires— *Mauri Rantanen* 102
Manufacture and properties of round cable beads— *Jan Prikryl* 110
Insulated wire and cable markets— *William T. Black and W. Stuart Lyman* 120

April

Veetrac—a new concept in wiredrawing— *W. Murray Tomlinson, John W. Pamplin and Richard Shillito* 66
A computerized approach to machine and raw material requirement planning— *James B. Richardson* 74
Wire drafting calculations the easy way— *Jean Tranier* 80
Noncontact ink jet printer for cable sheath marking— *Wayne M. Newton* 84
Upgrading wiredrawing machines saves $1 million 90
Raritan River rod mill on stream after delays— *Ruth W. Rose* 94

May

Lubricants for the wire industry: 1980— *Edward L. McMillan, Jr* 48
Marking inks for wire: the state-of-the-art— *Joseph C. Gemelli* 50
Custom coatings—key to lower costs— *Robert C. Lawrence, Jr.* 52
Chemicals & coatings roundup 54
ITT-Surprenant triples cable output with new planetary stranding machine 85
Direct-fired recuperators pay off at Interpace Corp.— *Frank E. Hangosky and Jack Maynard* 89
Wire cloth aids fight against water pollution 93
Wire breaks during steel cord stranding— *Luc Peeters* 96
Centrally controlling finished goods inventories in a nationwide chain of distribution centers— *David Abercrombie and Eddie Adams* 102
Tools for selecting extruder size— *Stewart E. Walton* 108
Horizontal continuous and semi-continuous casting developments— *David S. Calvert, Alec Cibula and Charles G. Claisse* 116

June

Drawing own wire heightens interest in steel rod 50
Cold heading steel wire into 57 million B-Bs 53
An evaluation of lubrication in wiredrawing— *Yoshimi Nakamura, Heijiro Kawakami, Tomiharu Matsushita and Hiroharu Sawada* 54
Improving the economics of wire coating lines— *Reuben Klein and Imrich Klein* 60
Completely dry curing and cooling process (FZCV) for XLPE cable— *Michio Takaoka, Masaichiro Seki, Hiroto Oshima and Masakazu Hasegawa* 64
Control of manganese and silicon in strand casting of low-carbon steel billets— *Malcolm Coburn and John T. Griffiths* 70

July

Opportunities for people and processes: Stelco's Continuous Rod Processing Plant— *James S. McLaughlin* 60
MP35N alloy—the ultimate wire material— *Leo J. Klingler and George A. Kurisky* 68
Insights into the production of rolled-shaped wire— *Alexander F. Sperduti* 78
Softening characteristics of copper base-conductors— *Tsutomu Inagaki* 86
Basel: 7th International Wire Exhibition roundup— *Anita M. Oliva* 92
Surviving the eighties— *William L. James* 102
Three fine wire drawing systems—an economic comparison— *Frederic B. Krafft* 103
Wire machinery review 106

August

Golden anniversary issue 62
Twin-belt caster enters the world of continuous cast and rolled rod— *Jean-Paul Dosdat and John M. Dompas* 90
Design your pickle line for pollution control— *J. Neil Stone* 98
An automated reel handling system— *John William Cook and Pekka Holma* 102
How to figure reel capacity—exactly— *I. Jack Diamond* 106
Comments on Black-Lyman article— *Peter Pollak* 107

September

50th Annual Convention: 1930-1980 21
Secor operations: production of continuous copper rod and subsequent wiredrawing— *Ian A. Dundurs, Douglas W. Hoey and Craig W. Walter* 120
Computerized automatic measurement of telephone cables— *Leo M. Chattler* 130
Comparison of adjustable speed drives for the wire and cable industry (Part 1)— *Richard Doligalski, Charles Geiger and Hans Kirchgaessner* 140
Safety cradles— *Helmut Classen* 148
Production of wire rod at Ivaco— *William Murray and Anton Tendler* 156
Manufacturing and testing of armored fiber optic downhole logging cable— *Eric N. Randall, Michael J. DiMauro and Robert L. Hall* 166
High-torque motors save $200 per winding head 174
Computerized energy system saves wire plant $100,000 178
A primer on galvanized steel wire 182

October

Wire rod imports and the independent wire industry— *Kurt Orban* 52
Rod supply: the domestic perspective— *James C. Van Vliet* 53
International Wire and Cable Symposium releases tentative technical program 60
Some aspects of drawing high-carbon steel wire for prestressed concrete strand— *Tsuyoshi Nishimura, Tadayoshi Fujiwara and Yasuhiro Tanaka* 64
Plating lines for treatment of Cu-wire— *Axel Augustini* 70
Rod and wire descaling by pneumatic blasting— *Bruce DeClark* 74
Modernization in the wire industry: rebirth of a wiredrawing machine— *Robert L. MacDougall and Masud A. Faruqui* 80
Comparison of adjustable speed drives for the wire and cable industry (Part 2)— *Richard Doligalski, Charles Geiger and Hans Kirchgaessner* 84

November

1980 convention roundup 14
Wire sculpture: gift to Association 28
Production Planning and Recording System (PPARS) for Australian Wire Industries' Newcastle Wiremill— *John R. Williams, John F. Mann and Barry T. Howe* 70
Strengthening of hard-drawn steel wire with improved ductility— *Toshihiko Takahashi, Michihiko Nagumo and Yoshiyuki Asano* 78
Modern drive systems and controls improve wire mill productivity— *Mohammed Safiuddin and Henry A. Dickerson* 86
Some geometrical characteristics of wires in wire ropes and cables— *Som D.S.R. Karamchetty* 98
Internal die grinder steps up efficiency—with electric spindle 106

December

Hurricane Industries: a new name in Texas steel wire fabrication— *Anita M. Oliva* 52
Metallurgist develops aluminum alloy suitable for nails 58
An update: the use of blowing agent concentrates in the manufacture of telecommunications cables— *Thomas C. Hodgson, Eugene F. Gouthro, S.M. Beach and Tina Locke* 60
Encapsulated pickling hooks— *Brian Boulton and Brian F. Smith* 64
Die design and automatic finishing increase die life— *Kenneth E. Glen and Thomas Maxwell* 68
Study of roll bending descaler for steel wire— *Chuzo Sudo, Masaru Takatani, Takeshi Masui and Hiroshi Nagai* 74
